Main Street Bridges over Interstate 35 – Bridge Rail Retrofit Project

On Monday, April 5, 2010, LOGOS Construction Company will begin construction of new concrete bridge safety rails along both sides of the Main Street bridges over Interstate 35. In order to complete the work in a safe manner, the contractor will need to close one lane of traffic on Main Street for each direction of travel during the phased construction.

Construction inspection and administration will be under the supervision of the Oklahoma Department of Transportation. The \$167,226.54 construction contract is being funded with 100% federal transportation safety funds. The contractor has 45 calendar days to complete all work.
